2. The following is an examiner's statement of reasons for allowance: The closest prior art is taught by Montgomery Jr. (US 4542943); however, said prior art fail to realize that "the symmetric top surfaces are oriented at least at an angle of 15 degrees with respect to a horizontal plane" provided unexpectedly good results or realized that such angle is a result-effective variable, therefore the claims are allowable as specifically called for in the claimed combination.
